Question-1:

Download the dataset: Dataset

Solution:

<https://drive.google.com/file/d/1xkynpL15pt6KT3YSIDimu4A5iRU9qYck/view>

Question-2:

Image Augmentation. **Solution:**

```
from google.colab import drive
drive.mount('/content/drive/')
data_path = '/content/drive/MyDrive/dataset/flowers/'
batch_size = 32
target_size = (64, 64)
```

Drive already mounted at /content/drive/; to attempt to forcibly remount, call drive.mount("/content/drive/", force_remount=True).

```
train_datagen = ImageDataGenerator(rescale=1./255,
                                   shear_range=0.2,
                                   zoom_range=0.2,

                                   horizontal_flip=True,
                                   validation_split=0.2)

test_datagen = ImageDataGenerator(rescale=1. / 255, validation_split=0.2)
```

```
X_train = train_datagen.flow_from_directory(data_path, target_size=target_size, batch_size=batch_size, subset="training", class_mode='categorical')
X_test = test_datagen.flow_from_directory(data_path, target_size=target_size, batch_size=batch_size,
                                         subset="validation",
                                         class_mode='categorical')
```
